Description	<p>The City Tunnel Waidhofen/Ybbs, linking-up to the existing Schillerpark Tunnel relieves the municipal road network from transit traffic on the B31 Ybbstal Road which has been running through the urban area. The tunnel consists of two mined sections and several cut-and-cover sections.</p> <p>The project includes the structural safety layout such as escape adits and escape shaft and the connection of the B31 to the municipal road network.</p> <p>During tunnelling works, the existing railway line is temporarily relocated for the construction of a permanent railway bridge.</p>
